

The excitement of change and the promise of growth. That's what you'll find in today's dynamic energy industry and in a career with Dominion.

Posting Title Gas Operations Engineer

Job # 11782BR

Location MD - Lusby

Job Summary As our Gas Operations Engineer will provide on-site engineering support to the Cove Point Liquefied Natural Gas (LNG) facility. You will develop, design, analyze, evaluate, and recommend construction, operating, and maintenance proposals by applying engineering theories, principles, and practices that contribute to efficient, safe, reliable, and profitable operations.

Specifically, you will evaluate operational problems, develop cost effective solutions, provide recommendations and implement resolutions.

You will provide project management services to Operations for capital and expense budget projects as well as review concept/design drawings, permit applications, and contracts for major capital projects. In addition you will assist in maintaining compliance with Department of Transportation (DOT) regulations, prepare accurate cost estimates for facilities proposals, prepare and administer service agreements, design contracts and construction contracts. You will manage the work of contractors, assist in acquisition of necessary permits for construction and facility operations and ensure accuracy of as-built information

Knowledge, Skills & Abilities

Candidates should have a four-year accredited Engineering degree (or four year accredited Engineering Technology degree with Professional Engineer's license) and knowledge of engineering principles, standards, and practices. Solid knowledge of and extensive working experience with natural gas transmission or LNG plant and off-loading operating policies and practices. You must have the ability to perform effectively in a high-paced, multitask environment; ability to independently plan and organize work schedule; ability to communicate effectively and develop rapport with internal and external customers; ability to manage projects and make independent decisions as well as the ability to operate a personal computer. Preferred candidates will have five plus years experience in field operations and facilities construction in natural gas industry, two plus years experience with LNG

ENERGY
FEEL THE

base load plant and off-loading terminals (including purification, liquefaction, boil-off vapor handling, storage and terminal vaporization) covering design & construction, project management, process engineering, writing of specifications, preparation and review of P&IDS, knowledge of DOT pipeline safety regulations, NFPA59A and CFR Title 49 PART 193, and other related codes/standards. Engineer-in-Training certificate or Professional Engineer's license.

Education Required: Bachelors in Engineering

Working Conditions You may be subjected to dust, debris and high noise levels, extreme temperatures and weather conditions during site visits or construction; hazards, such as proximity to moving mechanical parts, electrical current and exposure to solvents, lubricants and other chemicals during site visits. You must climb ladders, work over water, and work and travel through confined spaces including underwater tunnel. This is a safety sensitive position subject to random drug testing. You must possess a valid driver's license and order to operate a company vehicle.

Additional Information We offer excellent plans and programs for employees. Employees are rewarded with a competitive salary and comprehensive benefits package which may include: health benefits with coverage for families and domestic partners, vacation, retirement plans, paid holidays, tuition reimbursement, and much more.

Dominion is an equal opportunity employer and is committed to a diverse workforce.
