Envista Corporation

Envista is a provider of software as a service for the management oversight of infrastructure that is built and maintained by utility companies and government agencies. Headquartered north of Boston in Beverly, Massachusetts, the company provides the only centralized, web-based application to exchange and synchronize infrastructure projects in a highly visual, map-driven solution. Envista enables infrastructure coordination online to maximize construction budgets, optimize the planning of utility and roadway projects, and to reduce the public burden of poor coordination.
